

# Fitted Dust Mask Sewing Pattern

(S - M - L)

Set document to print at 100%, fill the page, no margins.

Sew with a 1/8 seam allowance (line fabric edge with edge of presser foot).

# Fitted Dust Mask Sewing Pattern

1. Cut out your desired pattern size.
2. Cut 4 pieces of the main fabric, and 2 pieces of the lining fabric. Main fabric should be traced and cut as 2 layers, right sides facing.
3. Sew 2 of the main fabric pieces together, right sides facing, along the curved front edge.
4. Sandwich the other 2 main fabric pieces in between both lining pieces, then sew along the curved front edge.
5. Open both halves of the mask, align right sides facing and pin at the nose and chin seams.
6. Cut 4 strips of 1/8 in elastic and pin each piece to each corner with the elastics inside the "pocket" of fabric.
7. Secure the edges with pins, then sew around the entire edge of the mask, leaving a 2 in gap on one of the flat sides.  
(Backstitch a few times over each corner to secure elastics)
8. Flip your mask right side out. Tuck the open edges of the gap, then sew a tight edge seam along the entire edge of the mask to finish.
9. Thread the elastics through a bead on each side. Tie the elastics together in a knot, trim excess. This makes the loops adjustable.
